EXECUTIVE SUMMARY

Scope of the Report

The present report being the third cycle of report for Kharif 2014 covers the results of field survey based acreage report of rice area transplanted and Basmati varieties in the different districts of Punjab, Haryana, Delhi, Uttar Pradesh, Uttarakhand, Himachal Pradesh and Jammu & Kashmir.

Study districts

The study area covers 81 districts, which includes 22 districts of Punjab, 21 districts of Haryana, 30 districts of Uttar Pradesh, 4 districts of Uttarakhand, 1 district of Himachal Pradesh and 3 districts of Jammu & Kashmir.

Rice Acreage

In **Punjab**, the rice transplanting has been 27,94,900 ha in 22 districts this year. Pusa-1509 has emerged as predominant variety after Pusa-1121 in the state occupying almost 2.47 lakh ha. area and an estimated production 11,25,000 metric tons. Pusa-1121 acreage (5.42 lakh ha) has also increased by 2% over the last year. CSR-30 also has

increased from 18,000 ha. in last year to 22,990 ha this year.

Tarntaran district lead in case of Pusa-1121 occupying 77,890 ha. while in case of Pusa-1509, Amritsar has been the leading district occupying 43,150 ha area followed by TarnTaran. The area under Basmati is 8,65,570 ha out of which the largest area is in Amritsar (1,30,390 ha), followed by Taran Taran district (1,26,000 ha). Other varieties like PB-1 has occupied 24,620 ha area and Sharbati a Non-basmati long grain variety has been transplanted in 38,370 ha.

In **Haryana**, Out of the total 11.38 lakh ha rice transplanted, 8.22 lakh ha has been estimated under Basmati varieties. Karnal has been the leading district occupying maximum area under Basmati (1,29,160 ha) with several varieties transplanted followed by Kaithal district (1,16,680 ha). In Haryana, Pusa-1509 has been transplanted in almost every block under Basmati and has occupied 1,26,580 ha area in the state with an estimated production 6,15,000 metric tons. Other varieties grown are Pusa Basmati-1, Punjab Basmati -3, Pusa-1401,

CSR-30, HBC-19. CSR-30 has again been preferred by the farmers in the state and has replaced Pusa-1121 in many districts. The variety occupied 1,46,130 ha area this year.

In **Uttar Pradesh**, a total of 14,12,180 ha rice transplanting has been estimated based on field survey in 30 districts this year. Out of the total 3,58,300 ha Basmati area, Pusa-1121 has occupied 1,91,500 ha, Pusa-1509 1,08,250 ha, Pusa Basmati-1 45,330 ha and the other varieties, Basmati-370, Type-3 have been transplanted in 13,530 ha. area. The production Pusa-1509 is estimated 4,40,170 metric tons.

In **Uttarakhand**, A total of 1,25,680 ha rice transplanting has been estimated based on field survey in 4 districts of the state this year. Out of the total 20,120 ha Basmati area, Pusa-1121 has been transplanted in 4,730 ha, Pusa Basmati -1509, 7,400 ha, Pusa Basmati-1 in 1,690 ha and Type-3 in

6,300 ha. The Udhampur district has the maximum area under Basmati occupying 8,900 ha. Out of which 6,100 ha has been transplanted under Pusa-1509.

In **Jammu & Kashmir**, three districts have been taken up for the study. The total rice area is estimated to be 1,42,100 ha. in these districts. Jammu is the leading district with 90,000 ha. Out of 65,640 ha Basmati area, basmati -370 has occupied 57,150 ha, Pusa-1509, 2,200 ha, Pusa-1121, 6,290 ha and the Non- Basmati long grain Sharbati 10,990 ha.

In **Himachal Pradesh**, Only Kangra district has the Basmati area in the state. Out of 15 blocks of the district, only 3 have Sharbati, Pusa-1121 and Kasturi Basmati. This year the transplanting of Basmati has not been very encouraging due to deficient rainfall and only 450 ha area has been transplanted under Basmati.

State wise total rice, Basmati varieties area has been given in table below:

Table : State-wise Transplanted Area, Basmati & Non-Basmati long grain Rice area during Kharif 2014

S. No.	State	Transplanted Total Rice	HBC-19 / Type-3/ 370	Pusa-1121	Super	PB-1	Punjab Basmati -3	Pusa-1401	CSR-30	Pusa-1509	Non-notified Sharbati	Sugandha	Area in '000 ha

1. Project Background

Basmati rice is an important export commodity among the food grains exported from India. During the past few years, the Basmati export has been growing steadily, from 7.71 lakh metric tonnes in 2003 to an estimated 35.0 lakh metric tonnes in 2013-14 on robust demand from the traditional markets in West Asia. Iran alone has been importing >40% of the total Basmati export from India. Now China has taken a decision to import Indian Basmati rice which is likely to further increase the Indian Basmati demand.

Timely information on the area and likely production of the crop before the harvest helps exporters and other decision makers involved in Basmati trade to take decisions about the quantum and time of export. The export of Basmati is on continuous rise year by year from India and has reached to >3.76 million by 2013-14. Realizing this potential, the Basmati Export Development Foundation (BEDF), New Delhi contracted M/s. Agri Net Solutions (A division of BPPL – a UPL Group Company) the work of field survey validation based acreage estimation for all rice, for Basmati crop for selected other non-notified varieties), crop health monitoring and yield

estimation and production for Basmati rice and non-notified varieties and questionnaire based sample survey of farmers, for 75 selected districts of Punjab, Haryana, Uttar Pradesh, Uttarakhand, Himachal Pradesh and Jammu & Kashmir, apart from Delhi, during Kharif 2011. During the year 2013, the number of districts has been increased to 81 in the selected seven states i.e. Punjab, Haryana, Uttar Pradesh, Uttarakhand, Himachal Pradesh, and Jammu & Kashmir apart from Delhi. This year the field survey based approach is being applied to collect the information at block level to improve the accuracy further to a desired level.

The Basmati varieties for which information is required include Basmati-370, Basmati-386, Type-3 (Dehraduni), Taraori (HBC-19), Ranbir (Ba smati – 370), Pusa-1509, Pusa Basmati-1, CSR – 30 and Pusa Basmati-1121 and non-notified, non-Basmati (Sharbati and Sugandha -5).

2. Scope of the current report

The present report being the third cycle of report for Kharif-2014 covers the results of field survey based total rice and Basmati acreage under various varieties in different states.

3. Study Area Details

The study is confined to 81 districts, which includes 22 districts of Punjab (Amritsar, Barnala, Bathinda, Faridkot, Fatehgarh Sahib, Firozpur, Fazilka, Gurdaspur, Pathankot, Hoshiarpur, Jalandhar, Kapurthala, Ludhiana, Mansa, Moga, Mohali, Muktsar, Nawanshahar, Patiala, Ropar, Sangrur and Tarantaran), 21 districts of Haryana (Ambala, Faridabad, Bhiwani, Fatehabad, Gurgaon, Hissar, Jhajjar, Jind, Kaithal, Karnal, Kurukshetra, Mahendragarh, Mewat, Palwal, Panchkula, Panipat, Rewari, Rohtak, Sirsa, Sonepat, Yamunanagar), 3 Districts of Jammu & Kashmir (Jammu, Samba and Kathua), 30 districts of Uttar Pradesh (Agra, Aligarh, Auraiya, Baghpat, Bareilly, Bijnore, Budaun, Bulandshahr, Etah, Kasganj, Etawah, Ferozabad, Gautam Buddha Nagar, Ghaziabad, Hapur, Hathras, J. P. Nagar, Kannauj, Mainpuri, Mathura, Meerut, Moradabad, Sambhal, Muzaffarnagar, Shamli,

Pilibhit, Rampur, Saharanpur, Shahjehanpur), 4 districts of Uttarakhand, 1 district of Himachal Pradesh and one of Delhi. The map of the study districts is given as Fig. The study districts form a part of the Himalayas and the Indo-Gangeic Plains.

4. Rainfall

The Basmati growing belt in all the states has witnessed deficient to scanty rainfall in the months of June, July & August this year leading to delayed transplanting and early earring of Pusa-1509. In Uttar Pradesh, the major western districts received scanty rainfall and facing electricity crunch due to which the crop is looking weak and yield reduction is expected.

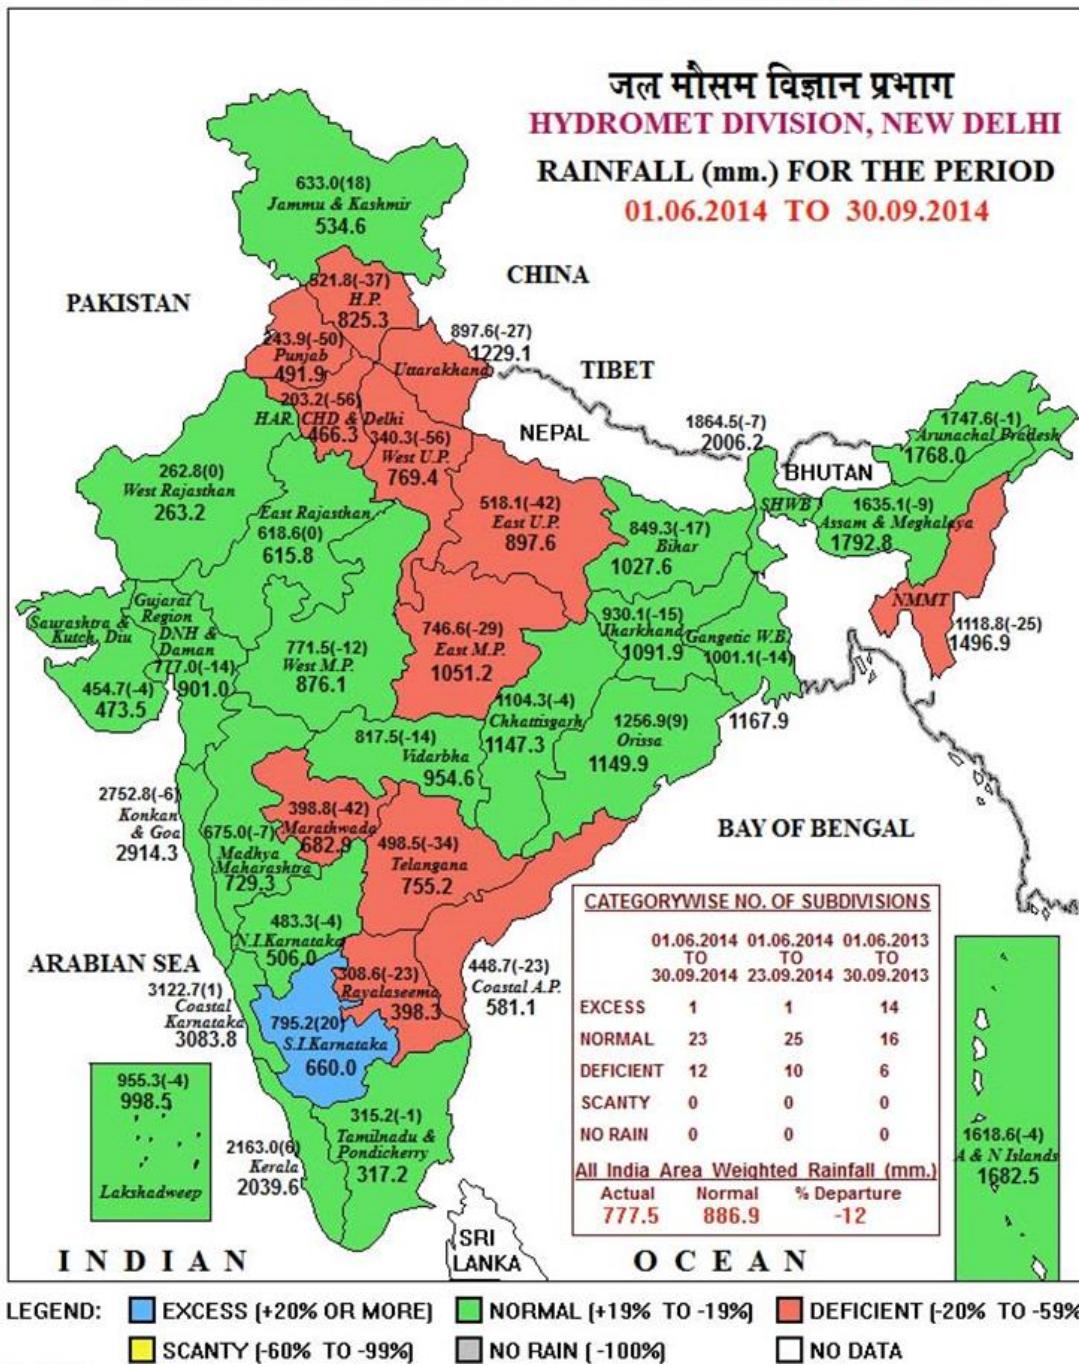

The new variety Pusa-1509 has occupied the area from other non-Basmati early maturing rices. The rainfall during 1 June to 30 Sept. 2014 in meteorological divisions under study area is given in table-1 and the rainfall in prominent districts in table-2.

[Ground Survey based Rice Acreage](#)[W. UTTAR PRADESH](#)[HARYANA](#)

In Haryana, the harvesting of Pusa-1509 & Sharbati is at full swing and Pusa Basmati-1 also ready for harvest. In general, the crop health is good and the weather conditions are favorable for good quality grain.

The district wise area figures under Basmati varieties has been given in Table-3 and block wise in annexures. The production estimates of Pusa-1509 and Sharbati are given in Table 3A.

[PUNJAB](#)

The harvest of all the Basmati & Non- Basmati varieties is delayed for a week due to heavy rains at maturity stage of Pusa-1509 & Sharbati. There is lodging of Sharbati crop in a few areas due to heavy rains but not significant. Harvesting of Pusa-1509, transplanted early in potato growing areas started early and now rest of the areas are also harvested. In general, the crop health is good and the weather conditions are favorable for good quality grain.

The district wise corrected area under Basmati varieties is given in Table-4 and the Block wise production of Pusa-1509 and Sharbati is given in annexure Table 4A.

In 10-15% area transplanting couldn't be done despite of raising nurseries due to deficient rains in initial months. In case of Pusa 1509, farmers even used over mature seedlings (40-45 days). Which resulted in early flowering. Pusa-1121 has flowered in all the areas and about 80-85% crop has reached milking stage. In the districts of Bulandshahr, Meerut, Muzaffarnagar and Hapur the crop of Pusa Basmati-1 has reached maturity stage. Almost 22-25% Pusa-1509 has been harvested. 12-15% area under Sharbati too is harvested. Arrivals of Sugandha -5 has also started in prominent mandies of Western UP. Price of sharbati ranges between Rs. 1,500/- to 1,900/- per quintal and Pusa-1509 which started at Rs. 3,400/- per quintal has reached between Rs. 2,500/- and Rs. 2,800/- per quintal. Pusa Sugandha -5 ranged between Rs. 1,800/- and Rs. 2,300/- per quintal.

Bakanae has been observed severely affecting the crop of Pusa-1509 and Pusa-1121. This year, there is a likely loss of 2-3% in case of almost all the Basmati varieties due to unfilled grains. The district wise area under Basmati varieties is

given in Table-5 and yield of Pusa-1509, Sugandha & Sharbati is given in Table 5A.

UTTARAKHAND

The district wise area under Basmati varieties is given in Table-6 and yield of Pusa-1509, Sugandha & Sharbati is given in Table 6A.

JAMMU & KASHMIR

The district wise area under Basmati varieties is given in Table-7.

HIMACHAL PRADESH

Almost 30% area couldn't be transplanted.

The district-wise target for total rice in Himachal Pradesh during Kharif-2014 is given Table-8.

**Table 3: District-wise acreage under total rice and Basmati rice in Haryana during Kharif 2014**
