

UNIT PACKAGING SYSTEM

Appropriate dimensions of pouches have been worked out for the following products of the capacities like

- i) 50gms and 100gms for Dehydrated onion flakes.
- ii) 50gms and 100gms for AFD Corn.
- iii) 100gm and 200gm for Dehydrated Garlic Powder.

The recommended unit pack is a pillow pouch with 4 side seals. It is recommended that the pouches should be flashed with an inert gas like nitrogen. This helps to extend the shelf-life of a product and also prevents insect infestation.

The dimensional details of the recommended pouches are given in Annexures – XIV, XVI & XVIII and the specification details are given in Annexures – XXIII, XXIV & XXV.
