# **Report on APEDA's Participation**

## **in World Food Moscow 2024**

### **1. Overview of the Exhibition**

World Food Moscow is an annual event that brings together professionals and experts of the food industry: food manufacturers and suppliers, buyers from wholesale and retail trade, as well as public catering enterprises. This year, more than 1,000 companies from 29 countries participated and showcased their products in two halls of the Crocus Expo at Moscow.

The exhibitors of the following countries participated in the exhibition: Algeria, Armenia, Belarus, China, Costa Rica, Ecuador, Egypt, Hungary, India, Israel, Japan, Kazakhstan, Republic of Korea, Kyrgyzstan, Malaysia, Middle East, Netherlands, Pakistan, Russia, Saudi Arabia, Serbia, Sri Lanka, Thailand, Tunisia, Türkiye, Turkmenistan, United Arab Emirates, Uzbekistan, Vietnam.

### **2. India's Pavilion**

The India pavilion was set up at the right middle zone in the main hall No. 14. The pavilion had a modern artistic design with detailed panels on products and uniform theme with India branding, making an attractive and eye-catching pavilion amongst the pavilions of other countries. For better comprehension of the local and CIS buyers, the brandings of APEDA theme area and also the stalls

were done in bilingual English and Russian languages.

### 3. Details of APEDA participants

APEDA organised its participation through its 17 member exporters and set up the pavilion with stalls of individual exporters showcasing a vast the range of agri products dealt by them. The detail of exhibitors is at Annexure-II

APEDA pursued with the participating exporters to prepare their publicity material and product labelling in English and Russian language both, which was followed by majority of the exporters and this has enabled the visitors to understand the product specifications offered by the exporters under India pavilion.

#### 4. Inauguration of India Pavilion

The India pavilion was inaugurated at the APEDA pavilion by Head of Economic & Commercial Wing at Embassy of India to the Russian Federation Dr. Vinod Gaikwad, Second Secretary of Economic & Commercial Wing Mr. Rajnish Patidar & GM of APEDA Mr. Vinod Kumar Vidyarthi in the presence of Mr. Chandra Sekhar Dudeja & participating exhibitors. The Head of E&C Wing at EoI to the Russian Federation complimented the efforts of APEDA in setting up of a vibrant India pavilion.

He had a detailed interaction with most of the exhibitors/exporters.

Inauguration of Pavilion

Interaction with Exporters

## 5. Wet sampling

An important and popular part of APEDA pavilion is the exclusive promotion of basmati rice was carried out. An Indian style Biryani was got prepared through a prominent Indian restaurant and was served to the visitors.

## 6. Banana Promotion

Russia imported USD 794 Million Bananas in 2022, becoming the 4th largest importer of bananas in the world. At the same year, Bananas was the 53rd most imported product in Russia. Russia imports bananas primarily from Ecuador (\$780M), Colombia (\$8.58M), Vietnam (\$3.68M), Costa Rica (\$513k), and Georgia (\$434k).

Recently, Russia has shown keen interest in the procurement of tropical fruits from India with bananas being one of them, which significantly is a major Agri import of Russia, which was presently, primarily being imported from Ecuador, in Latin America.

Sporadic efforts have been made in the recent past for export of fresh banana from India to Russia. A consignment of 20 MT (1540 boxes) of bananas was flagged off in February 2024 from Maharashtra by APEDA in a collaborative effort with the Central Institute of Sub-tropical Horticulture (CISH) after the development of sea protocol employed for this shipment by CISH for maintaining the quality of fruit in transit. The harvested bananas from Andhra Pradesh and Maharashtra were brought to an APEDA approved packhouse in Maharashtra where it was graded, sorted, packed, boxed and stuffed in containers. The container was transported to JNPT for further voyage to Novorossiysk port, Russia for the final destination at Moscow Russia. The trial shipment was successful, however some improvements in the post-harvest process suggested by Central Institute of Subtropical Horticulture have been worked upon.

Considering the importance of placing India as a regular supplier of fresh banana in Russian market, APEDA focused on the promotion of Banana in the World Food Moscow which was held from 17-20th September 2024. World Food Moscow is the largest food fair in Russia and CIS countries.

A sufficient quantity of banana for wet sampling at WFM was air transferred to Russia after completion of the phytosanitary requirement and other necessary requirements. Wet sampling of fresh banana was made through the pavilion of APEDA at WFM. The business and general visitors liked the taste of banana as compared to bananas from Ecuador. Business enquires have been received with regard to the specifications, certification, shelf life and pricing, etc.

After considering the various factors following issues are to be looked into for placing India as a sustainable supplier of fresh bananas into Russian market.

- Proper training and infrastructure are required specially for the post-harvest handling of banana with help of CISH so as to improve shelf life which will help to target other regional ports of Russia such as St. Petersburg & Vladivostok. Presently the shelf life of bananas from Ecuador is 60 days whereas the shelf life of Indian banana is 30 – 35 days.
- Collaboration with shipping lines to optimize freight charges, ensuring our produce remains competitive.
- While other things can be met pricing remains a major decision-making factor in comparison to Ecuador.

- Establishing a strong brand identity for Indian bananas is imperative, as it will create a lasting and sustainable image for the product on supermarket shelves.
- An Indian banana promotion programme may be organized in the identified supermarkets of Russia with planned promotion digital and physical promotion through all possible media.
- Ecuador banana price moves upwards in December and this is right time for Indian banana to capitalize.
- Russia is giving Indian exporters greater market access. The Russian government is working to remove non-tariff barriers currently hindering imports of agricultural products and food items from India.
- New Delhi and Moscow are also discussing initiatives such as building warehouses near Russia's largest ports to store high-demand Indian products, providing Russian buyers greater access while reducing costs and time.
- There is significant potential to enhance trade between India and Russia, highlighting the increased contacts between Indian importers and Russian buyers, facilitated by government bodies through exhibitions and special presentations of key Indian export items.
- Lastly, frequent promotions, better freight and continuous improvements on post-harvest technique will help Indian banana to foster in Russian market

The other important features of the Russian market for Indian Bananas are as under:

Voyage Time: Loading from the Port of Nava Sheva or the Port of Mundra to the port of Novorossiysk travel time is 20 days.

Shipping Companies: FESCO, LDB, BEACON

Bankers: Sberbank and VTB for easy and best exchange for rupee/ruble

Insurance Companies: CAO VSK, Alfa Strakhovanie, RESO Garantiya, VTB Insurance

## **Facts about Banana:**

- Russia imported USD 794 Million Bananas in 2022, becoming the 4th largest importer of bananas in the world.
- In the same year, Bananas was the 53rd most imported product in Russia.
- Russia imports bananas primarily from Ecuador (\$780M), Colombia (\$8.58M), Vietnam (\$3.68M), Costa Rica (\$513k), and Georgia (\$434k).
- During the lean production period of Ecuador especially in winters, India has an edge in Russian market in exports of banana to Russia.
- India is the world's largest producer of bananas, accounting for a significant portion of global banana production. India's share in the global banana export market remains limited at 1 % despite the sizable banana production.
- India has a conducive agro ecology to cultivate banana at huge scale due to availability of Cavendish banana varieties such as Grand Nain and Chiquita propagated through tissue culture to retain utmost genetic purity for enhanced productivity and quality as per the requirements of importing countries
- India has a sizeable production of Plantains bananas especially in Southern States of India with many recipes to cook bananas as well.
- To fully capitalize on India's diverse banana varieties and potential, focusing on GI-tagged and traditional varieties is also proposed. These varieties hold untapped potential for export to markets like West Asia, China, Central America, and Europe, catering not only to the international consumer but also to the Indian diaspora.
- Russia, with its increasing demand for tropical fruits and limited domestic production, presents a promising market for Indian bananas. The Banana Festival in Moscow offers a unique opportunity to highlight the sustainability, profitability, and uniqueness of Indian banana varieties, both traditional and GI-tagged alongwith banana value added products such as banana juice, pulp, freeze dried banana, dehydrated banana, banana powder, mixed fruit juice of banana and such by promoting them as premium export products.

### **Objective of the Banana Festival at Moscow:**

- To promote Indian banana and its value-added products including GI-tagged and traditional varieties, and their value-added products in the Russian market through exhibition, workshops, social media campaigns to create mass awareness among banana consumers and enlighten banana consumers about banana health values with suitability in Russian cuisines such as banana pan cake and other confectionery items.
- As an innovative product, we may promote banana pulp fortified with various supplements for consumption in a convenient form as per use and adaption.
- To showcase India's diverse GI and traditional banana varieties, emphasizing their unique flavors, textures, and nutritional benefits.
- To compete with tropical Banana suppliers in Russia by offering premium, high-quality banana products.
- To provide a platform for Indian banana exporters to network and engage with potential retail chains, buyers, retailers, and importers in Russia.

The economic and health importance of banana and its value-added products along with health value is attached herewith.

The Trade Statistics of India- Russia is attached herewith in **Annexure I**

World Food Moscow 2024 – Revelation

APEDA participated World Food Moscow 2024 and received an overwhelming response in the exhibition.

### **Following are some of the observations during the exhibition:**

- a) Russia food market is approx. 23 billion USD, export of APEDA schedule product is USD 340 million and export of agri product to Russia is about 800 million. Hence, India has marginal presence in Russian agri food market.
- b) Geographically Russia is bestowed with natural resources and most of the area is occupied by snowfall for 9 months. Therefore, Russia has very limited arable land for agriculture and food processing requires primary

and secondary agri products.

- c) India's natural arable lands suitable for all types crop cultivation will help India be a natural supplier of agri food products to Russia
- d) Russia has been a natural trade partner of India since long and offers cordial, lucrative business environment to Indian exporters.
- e) Russia follows sanitary and phyto-sanitary norms of EU along with their standards. Hence, Russian consumers of agri food products are tuned for consuming quality foods.
- f) The recent conflict between Russia and Ukraine turned into full-fledged war on 24 February 2022. Since then, food supply to Russia has been disrupted.
- g) Russia is not comfortable in retaining the food supply from Europe because most of the EU countries alongwith Ukraine are the partners of NATO.
- h) Above scenario has resulted into an opportunity in disaster (आपदा में अवसर) for Indian exporters of agri food sector.
- i) After the war, APEDA participated in World Food Moscow 2022, 2023 and 2024 opening constant business opportunities in Russia. During the last two years participation of India in World Food Moscow, India had more opportunity which could not be envisaged. Slowly other Asian countries such as Vietnam, Thailand, Indonesia etc. have started occupying the market space created due to war. Participation in the exhibition has extended the horizon of Indian agri food industry in Russia.
- j) Ecuador dominants banana market in Russia though they have more transit time in comparison to India. During a discussion with banana importers at exhibition, it is revealed that Ecuador banana has a shelf life of 60 days whereas India banana has a shelf life of 30 to 35 days. On investigation, it was found that in India we do not have any prescribed export standards, there is no pre and post-harvest manuals to improve quality (physical, biochemical and sensory) and shelf life of banana.
- k) Voyage period is approx. 40 days with distance 9156 nautical miles (nm) from Port of Guayaquil, Ecuador to Port of St. Petersburg, Russia

approximately same to Novorossiysk Port, Russia

- l) Voyage period is approx. 36 days and distance are 8675 nautical miles (nm) from Mumbai Port, India to Port of St. Petersburg, Russia almost same to Novorossiysk Port, Russia
- m) There is marginal difference of delivery time to Russia. Therefore, we have to initiate steps to increase shelf life of Indian banana by introduction MAP, Pre & Post harvest advance practices as adopted by Ecuador.
- n) The ocean freight charges are high due to limited export to Russia. Once, export volume to Russia increases then ocean freight charges may go down. Hence, it will improve competitiveness of Indian origin agri food products
- o) Ecuador is placed at southern hemisphere of the globe whereas India is at northern hemisphere. Therefore, both the countries have opposite winter & summer session. During winter season especially in November-December onwards, Ecuador has lean period for production whereas India has round the year production.
- p) Insurance: During interaction with exporters in the exhibition, it was informed that ECGC is not providing the insurance cover for export consignments to Russia because of political unrest and ongoing Russia – Ukraine war / conflict. India based Insurance Companies are also reluctant to give insurance cover to export deals of Russia. It is proposed that we may organize a meeting with Russia based insurance companies as they are giving insurance cover for export deals of Russia.
- q) Banking: Russia is facing sanctions from UN due to ongoing Russia – Ukraine conflict. Many banks of Russia are under prohibited list and international trade in hard currencies is not allowed. Both countries prefer trade deals in their respective currencies i.e India in INR and Russia in Rubel. Exporters have reported that they face problems for issuance of Bank Realization Certificate against their export deals to Russia. In this regard, we may organize stakeholder consultation.
- r) Business routings: on account of UN sanctions on Russia, Business Deals routed through Belarus, Latvia, Lithuania, Estonia, Turkey, UAE etc which is affecting our real time export to Russia. We have to examine increase of Indian exports to Belarus, Latvia, Lithuania, Estonia, Turkey,

UAE during the last 3 years. It will enlighten us to formulate a conclusive strategy.

A list of Potential varieties of Indian GI bananas to be showcased is attached herewith.

### **Recent Developments:**

- APEDA has made progress in the Russian market with a trial shipment for Indian bananas This shipment capitalized on the opportunity created by Ecuador's shift in trade priorities, opening a promising market for Indian bananas. Supported by APEDA and developed with guidance from the Central Institute of Sub-tropical Horticulture (CISH), the consignment followed a new sea protocol to ensure the fruit's quality during transit.
- It promotes Indian bananas in the Russian market, showcasing their quality and unique characteristics while capitalizing on emerging trade opportunities.
- In world Food Moscow, 2024 we have several success stories which needs to be complied for submission to DOC.

### **Submission**

1. APEDA may organize the Banana Festival in Moscow in the month of November 2024 in collaboration with the Embassy of India (EOI), Moscow, Chamber of Commerce in Russia, Major Retail Chains etc.
2. In the event, we will focus on promoting India's banana and its value-added products, including GI-tagged and traditional banana varieties, the details are given below:

<b>Srl No.</b>	<b>Types of Banana</b>	<b>Variety / Products of Banana</b>
1.	Fresh table variety	Cavendish Grand Naine bananas, GI Varieties of banana
2.	Processed banana products	Dehydrated banana, Banana powder & Flour, Banana Pulp & Puree, Banana chips, Banana juice, Mixed Juices, Candies, Jam, confectioneries, Alcoholic & Non-Alcoholic beverages etc.

3.	Innovative processed banana products	<p>*Freeze dried banana and their processed products</p> <p>Banana pulp fortified with various supplements for consumption of its in convenient form to use and adaption.</p> <p>Banana Fig are dried or dehydrated banana fruits with sticky consistency and very sweet in taste.</p>
----	--------------------------------------	--

I. \*Freeze dried banana Freeze-drying or lyophilization is a dehydration technique based on the sublimation of water in a product. This means that the product's water content transitions from a solid to a gaseous state — or from ice to vapor — without going through the liquid state.

II. Freeze drying, also known as lyophilization or cryodesiccation, is a low temperature dehydration process that involves freezing the product and lowering pressure, thereby removing the ice by sublimation. This is in contrast to dehydration by most conventional methods that evaporate water using heat

III. This is an advance technology adopted by Indian agripreneurs and is getting popularity in India over dehydration processed of fruits and vegetables.

IV. The main advantage of freeze drying is to retain 97% per cent of its nutrition value, sensory attribute, enhanced shelf life and wider acceptability in developed countries such as USA, Europe, Australia, Japan, South Korea, etc.

3. A trade delegation of banana exporters dealing in both fresh and processed banana products may participate.
4. APEDA may invite foreign retail chains and potential banana importers in Russia to explore trade opportunities.
5. Renowned chefs specializing in banana-based products may be invited for live sampling and culinary demonstrations to showcase the value-added potential of Indian bananas. These demonstrations will highlight the versatility of bananas in Russian cuisine.

6. We may initiate social media drive for the banana festival. In this regard, we may hire an agency through EoI, Moscow.
7. We may hire an agency through EoI, Moscow to collect custom data from various Russian ports (sea and air) for analysis, evaluation, compilation of real time importers contacts details, etc.
8. We will organize international workshop / seminar in Moscow for the events wherein we will invite Russian trade experts physically whereas India side experts will join virtually. It will help in creating mass awareness about Indian banana.
9. Apart from ICAR-CISH Lucknow, we may also interact with ICAR-NRC bananas, Tamil Nadu for Technical Inputs on Bananas.

**Other Submissions:**

- a) We may select top 5 retail chains to display banana, their valuable products and to organize wet sampling of all banana products.
- b) We will also invite importers, retail chain representatives, Russian Government Officials, Chamber of Commerce in Russia, trade bodies representatives in Russia, in this regard, we will prepare a list of invitees.
- c) Spices Board is in process of opening an office in Moscow to facilitate their exporters. On the same line, we may also initiate a proposal for submission to DoC.
- d) It is pertinent to mention that M/s Trident Exhibitors Private Limited, Delhi (an exhibitor company, APEDA has awarded work for various exhibitions in the past) has facilitated Indian exporters in setting up of virtual office in Moscow. Since, July they have facilitated 10 exporters to set up virtual office in Moscow wherein M/s Trident Exhibitors Private Limited has facilitated exporters for display of their products, finding the potential buyers, negotiating the business deals, etc.
- e) We have a modal of APEDA facilitation centre in abroad, it's an extended version of Virtual office abroad. If required, we can submit the detailed proposal to Competent Authority for further action.
- f) To boost exports from India to Russia, we may request MoFPI to set up Indo-Russia Food Parks exclusively to produce Russian

cuisines/traditional/ethnic ready to eat/process Food products because some buyers in Russia have shown interest in investment in Indian Food Processing sector.

## 7. Other promotional activities:

Special arrangements were made for Indian traditional Henna application on the hands for the female visitors who visited the APEDA pavilion. A Henna artist residing in Moscow was deployed for this purpose. This was an added attraction especially for the female visitors.

## 8. Interaction with visitors

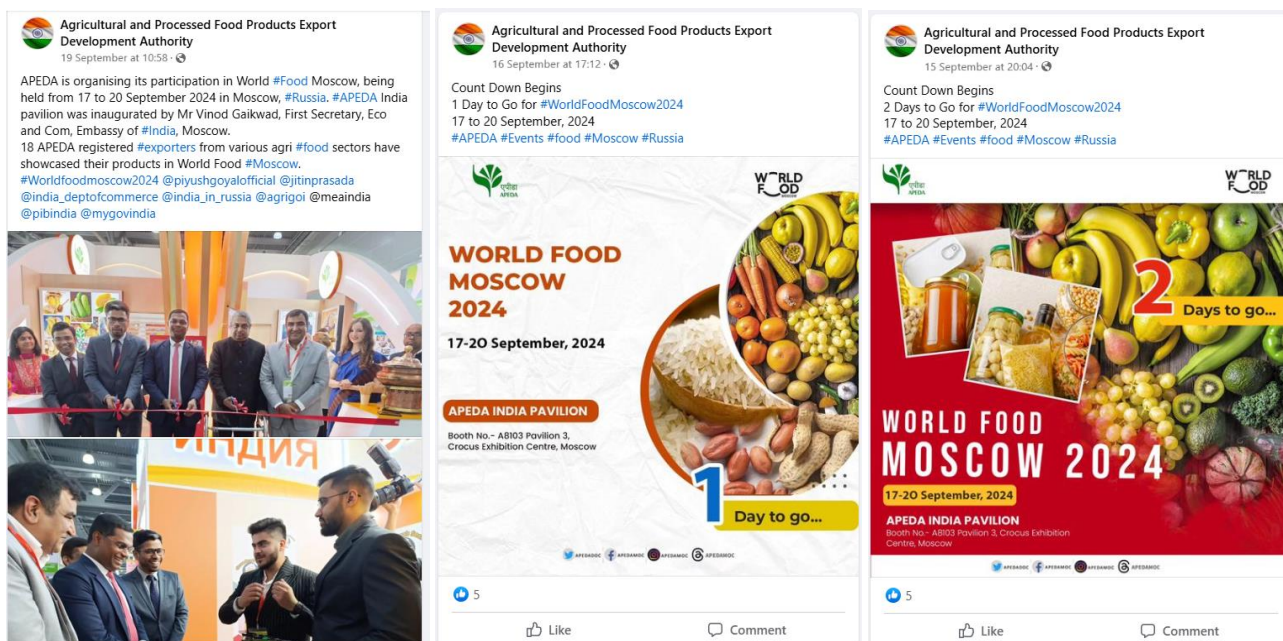

Publicity material i.e. APEDA brochure, participants directory was prepared in English and Russian languages and same were given to all visitors for their reference.

For the facilitation for communication with the visitors, interpreters and hostesses were engaged who were well versed in English and Russian languages. This helped the exporters to interact and communicate with the visitors properly. Meetings were also held with potential visitors in the common area set up for interaction.

## 9. Publicity through social media

One week before the show, APEDA started publicizing the event by posting infographics at APEDA Website and through social media handles such as twitter, facebook, instagram, etc. Social media updates about the show were uploaded on a daily basis during the show.

## 10. Print Publicity

Posters depicting potential Indian produce in Russian market were got prepared in both Russian and English and showcased in the theme area. The booklet on APEDA corporate brochure and Exhibitors director at APEDA pavilion were got prepared in Russian and distributed to the visitors.

## **11. Feedback**

The feedback was taken from the participant exporters through a feedback form. As per the feedback compiled, the participants exporters got good response in terms of enquiries and generation of business orders.

The common feedback from the participant exporters has been about the good rating about overall participation. The lay out and design of the pavilion has been appreciated by the participants. The participants have suggested for repeated participation in the future. Some of the exporters reported that they got good orders and some have got the encouraging response/enquiries. Some of the suggestions have been received from the participants were about having the larger stalls, provision for wi-fi, food, snacks and the event needs to be publicized in advance, etc.

It is expected that World Food Moscow is visited by more than 30,710 buyers (foot fall) from wholesale and retail trade and public catering enterprises. APEDA pavilion received more than 500 enquiries for different products and various other activities with an expected footfall of 5000 visitors (foot fall) during the 4 days of the exhibition. As reported by APEDA exporters, it is expected that enquiries for a business of around USD 26 million has been generated during the event and the exporters will be negotiating with the buyers for converting these to final transactions.

## **12. Conclusion**

In overall the APEDA participation under India pavilion organized through Embassy of India has been a good success. Participation in the event has enabled to publicize Indian food products not only in Russian market but in the entire CIS region as large number of visitors from CIS region visited the APEDA pavilion.

## Annexure-I

### List of Participating Exporters at APEDA Pavilion

S. No.	Company Name	Products on Showcase
1	B.D. OVERSEAS, Taraori Karnal	All type of Basmati Rice
2	DELICIOUS FOOD, Mahuva	Dehydrated onion - garlic and fried onion
3	G.S. EXPORTS, Navi Mumbai	Peanuts, Sesame, Raisin, Spices, other oilseeds & agro products
4	GAURAV TRADING COMPANY, Ahmedabad	Sesame seeds, Cumin seeds, Groundnut, Millet
5	GRANDMA'S SECRET RECIPE, Vikaspuri	Sauces and Pickles
6	GUJARAT PEANUT PRODUCTS LIMITED, Rajkot	Raw Peanuts, Blanched Peanuts, Hulled Sesame Seeds, Cumin Seeds, Fennel Seeds
7	GURUKRUPA CORPORATION, Navi Mumbai	Fresh Banana, Fresh Grapes, Fresh Mango, Vacuum Boiled Corn Cob & Exotic Fruits from India
8	MAHADEV FOODS AND SPICES, Mahuva	Dehydrated Onion, Dehydrated Garlic, Dehydrated vegetables, Indian Spices
9	MANSI FOODS, Mahuva	Dehydrated Onion, Garlic & other Vegetables.
10	NATURE ONE FRESH PRODUCE PRIVATE LIMITED, Mumbai	Fresh Table Grapes and Banana
11	NEXTON FOODS PVT LTD, Pune	Fresh Vegetables and fruits/Frozen Vegetables and Processed foods
12	P.K.OVERSEAS PVT. LTD., Delhi	India Salaam Basmati Rice, Mansa Premium Rice, Al Habib Rice, Rajshahi Basmati Rice & More
13	PANCHVATI EXPORT, Mahuva	Dehydrated Onions and Garlic
14	REAL DEHYDRATES, Mahuva	Dehydrated white onion & garlic products
15	SEE GREEN ORGANICS, Mumbai	Spices, Herbs, Seasonings, Peanuts, Raisins, Millets, Pulses, Oleoresins, Tea & Coffee
16	SHIVA SPICE WORLD, Deesa	Turmeric Powder, Turmeric Fingers, Red Chilli Powder, Red Chilli Crushed, Red Chilli Flakes, Chilli Seeds, Red Chilli Whole, Coriander Powder, Cumin Powder, Curry Powder, Ginger Powder, Nutmeg Powder, Cinnamon Powder, Clove Powder, Black Pepper Powder, Cardamom Powder
17	VEER AGRI INDUSTRY, Meerut	Non-Basmati Rice, Basmati Rice, Peanuts, Sesame seeds, Mango Pulp, Miscellaneous
18	VISHAKA RAISINS, Nashik	Indian Raisins
